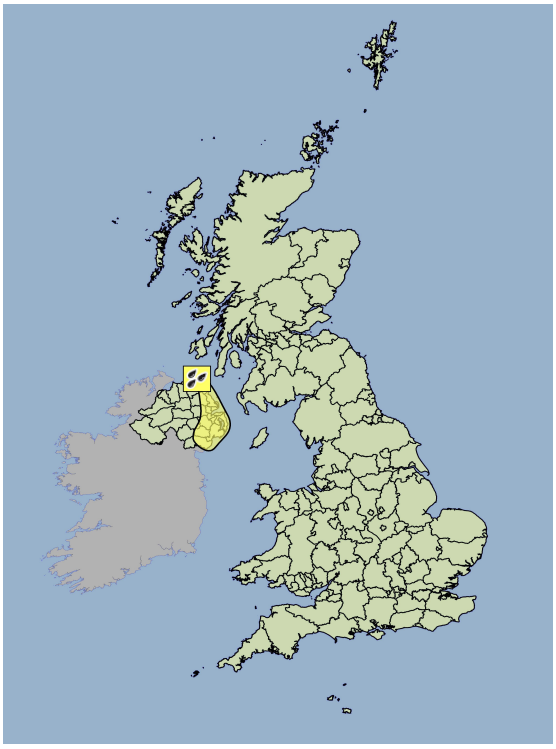
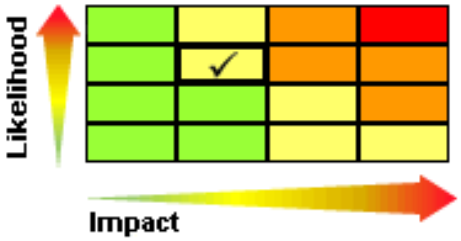
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system will move eastwards across Northern Ireland on Friday evening clearing eastwards in the very early hours of Saturday. This will bring a band of heavy rain with gales affecting some coasts. Some 10-15 mm of rain is likely, with perhaps as much as 20 mm on high ground. With the ground already saturated this may lead to localised flooding.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **20:00 on Fri, 07th Feb 2014** until **01:00 on Sat, 08th Feb 2014**

Outbreaks of rain will become heavy and persistent for a time on Friday evening, accompanied by southeasterly gales around exposed coastal areas, before clearing eastwards in the very early hours of Saturday.

The public should be aware that with the rain falling on saturated ground, there may be some localised flooding and associated travel disruption.
